

Patentability Consultations

- **Case 2839:** Client is an independent inventor seeking advice on the patentability of a system to neutralize airborne viruses using a fan and UV lights.
- **Case 2184:** Client, a disabled combat veteran, seeks advice on the patentability of his build-your-own pipe system and method for the vaporization of medical marijuana intended to assist indigent patients.
- **Case 1870:** Client is an independent inventor seeking to protect his new card game by filing a utility patent. In addition to a tabletop incarnation, the client envisions his game as being played in an online form and on a physical machine in a casino.
- **Case 9581:** Client is an independent inventor seeking advice on the patentability of an invention that would allow for self-charging electric vehicles to drive long distances without the need to connect the vehicle to a stationary power source.
- **Case 9111:** Client is an independent inventor seeking advice on the patentability of an adult intimate toy.
- **Case 9640:** Client is an independent inventor seeking advice on the patentability of a board game created to help teach children addition and subtraction. Client has been prevented from completing a prior art search due to their visual disability.
